

Below is a list of all courses, the current status and the last term the course was offered. If a course has never been offered or the last term the course was offered is prior to 1990 the Last Term Offered will be blank. If a course has been approved within the last five years the approval term is noted in the New Course column.

Course Statuses: *(definitions per university policy)*

Active courses are those that have been offered or are new within the last five years and appear in the respective IUP Catalog.

Inactive courses are those that have not been offered within the past five years, but may be offered at the discretion of the department/college. The College Dean/Department Chair may request an inactive course to be re-activated by emailing the Registrar's Office (registrars-office@iup.edu) to inform them of their intent to offer the course. Inactive course numbers are NOT available for re-use with the following exception. Courses that have not been offered for at least ten years, may be re-used; however, they must first be discontinued under the existing title, before being proposed as a new course and title.

Discontinued (deleted) courses are no longer able to be offered. Re-activation of a discontinued course requires a new course proposal. Discontinued course numbers that have not been offered for at least ten years, may be re-used.

Questions regarding the approval/deletion processes should be directed to the respective curriculum committee(s).
