## Program Revision Template

**Steps to the approval process:**

1. Complete the applicable template(s) and email them to the departmental or program curriculum committee chair.
2. The curriculum chair emails the proposal to the curriculum committee, then to the department/program faculty for a vote and finally to the department/program chair.
3. The department/program chair emails the proposal to [curriculum-approval@iup.edu](mailto:curriculum-approval@iup.edu); this email will also serve as an electronic signature.
4. Curriculum committee staff will log the proposal, forward it to the appropriate dean's office(s) for review within 14 days and post it on the X Drive for review by all IUP faculty and administrators. Following the dean's review the proposal goes to the UWUCC/UWGC and the Senate.
5. Questions? Email [curriculum-approval@iup.edu](mailto:curriculum-approval@iup.edu).

**Rationale for Proposed Changes**

<p>Why is the program being revised?</p>	<p>The changes are made to reconcile differences in the Information Assurance Minors as listed between the Criminology and Computer Science departments. Passage of proposals from Criminology and Computer Science will result in same listing by both departments.</p> <p>Notes have been renumbered according to the order in which they are referenced.</p> <p>An Information Assurance minor is one of the possible minors that a Computer Science major may select from to fulfill the program's minor requirement. The course COSC 345 contains the content on computer networking, which is the major vehicle of threats to information assurance. Furthermore, COSC 345 builds upon in-depth foundation of a Computer Science major. Therefore, Computer Science majors are required to take COSC 345 when completing an Information Assurance minor. COSC/IMFG 352 is considered to be a networking course for non-Computer Science majors. The Information Assurance Minor listed in Computer Science had replaced COSC/IMFG 352 with COSC 345, however this change is not applicable for non-Computer Science majors since COSC 345 is dependent on greater knowledge of Computer Science and Mathematics. Therefore, COSC/IMFG 352 is added back as an option for non-Computer Science majors.</p> <p>Courses COSC 429 Digital Forensic and COSC 454 Information Assurance Administration in new note (4) are new courses which have already been approved. These courses are applicable as options for Criminology majors to take in completing an Information Assurance minor.</p>
