

Labyrinth Center

The **Labyrinth Center** provides a comprehensive and holistic approach to support IUPUI students with autism spectrum disorder (ASD) as they build relationships, gain independence, experience academic success, and graduate from IUPUI with the professional and personal skills needed to embark on a fulfilling life and career.

Labyrinth is designed to be a multidimensional program based upon best practices in college programs for students with ASD and is committed to providing consistent and comprehensive services led by experienced faculty and staff members.

The IUPUI **Labyrinth** model consists of four components that provide enhanced supports to IUPUI students. The components include a 1-credit course taken each semester, academic and life coaching, supervised study sessions, and peer and faculty mentoring.

IUP Labyrinth components

Credit-Bearing Curriculum:

The curriculum is composed of a required 1-credit course taken each of the eight semesters that the **Labyrinth** student is enrolled at IUP. Course content will be dedicated to the skill sets necessary for building relationships, increasing independence, academic success, and professional and personal growth.

Academic and Life Coaching:

Each **Labyrinth** student will meet weekly with an academic and life coach. Coaching sessions will address current academic standing, course requirements, time management, residential concerns, communication issues, procedural questions, and any other related academic or social concerns.

Supervised Study Sessions:

Each **Labyrinth** student will attend four hours per week of supervised study in the **Labyrinth Center**. These sessions will be supervised by coaches and staff members in order to provide support related to good study habits and productive use of designated study time, with a focus on current and upcoming assignments, examinations, and projects.

Peer and Faculty Mentoring:

All **Labyrinth** students will initially be assigned a trained peer mentor to facilitate social understanding on the college campus. The two students will meet for a minimum of one hour weekly. Peer mentors will be closely supervised throughout the year by **Labyrinth** faculty and staff members. When students reach their junior year, a faculty mentor will be identified to support their career-specific needs.

Following their acceptance to IUP, students apply to the **Labyrinth** program. Students are encouraged to begin the admissions process as early as possible.
