

Indiana University of Pennsylvania FY2022-23 Comprehensive Planning Process (CPP) Budget

As part of System Redesign and as outlined in the memo received from the Office of the Chancellor on August 3, 2021, the State System has created a comprehensive, strategic planning tool set that aligns multiyear System and university goals, net price strategies, budgets, and academic planning. These efforts have been integrated into the Comprehensive Planning Process (CPP), which is a three-year plan (FY2022-23 through FY2024-25) for each of the universities, including IUP.

The following motion will be presented for approval at the public meeting.

FY2022-23 Comprehensive Planning Process (CPP) Budget

The committee reviewed the FY2022-23 IUP Comprehensive Planning Process (CPP) Budget, which was submitted to the System on October 12, 2022.

The following motion is recommended for approval:

THAT THE FY2022-23 IUP COMPREHENSIVE PLANNING PROCESS (CPP) BUDGET THAT WAS SUBMITTED TO THE SYSTEM ON OCTOBER 12, 2022, BE APPROVED.

Comprehensive Planning Narrative Indiana University of Pennsylvania

As submitted September 16, 2022

Resubmitted September 28, 2022
Revised October 12, 2022

Reports should be no more than 15 pages.

Executive Summary

Please insert the Executive Summary chart from the CPP Excel file. Provide a brief (one page) narrative describing the university's financial projections and how the university will achieve at a minimum a balanced operating result and a minimum student/faculty ratio. Items in red must have an explanation detailing the university's strategies to address the negative trends.

For universities projecting a negative operating result in the revenue less expenditure line:

- 1. Describe the university's strategies to achieve a balanced annual operating projection by the completion of the projection period (FY 24-25) and meet the associated minimum fall 2010-11 student/faculty ratio goal as outlined in Part 4, Academic Program Strategies.
- 2. If the use of reserves is required during this period to address the deficits, explain the resulting net assets and cash position and impact on ongoing operations and sustainability.

For universities projecting a balanced or surplus operating result:

1. Briefly describe the use of the surplus for student success/deferred maintenance and/or replenishment of reserves in alignment with the Sustainability Policy.

All universities are required to open the Executive Summary with the major themes received from the prior year CPP Summarized Feedback Comments and any associated updates.

E&G and Auxiliary Funds – Executive Summary Chart:

Executive Summary

(\$ in Millions) **ACTUAL ACTUAL PROJECTED** FY 2022-23 % Change FY 2023-24 Change FY 2024-25 % Change FY 2020-21 FY 2021-22 Revenues and Use of Supplemental Resources/Adjustments Less Expenditures & Transfers (\$21.5 \$2.9 \$4.5 -580.3% -31.3% 48.3% **Total Estimated Unrestricted Net Assets** \$76.6 \$80.0 \$59.2 -26.0% \$45.2 -23.7% \$38.3 -15.3% Total Estimated End of Year Cash Balance \$81.7 \$84.0 \$63.2 -24.7% \$49.2 -22.2% \$42.3 -14.0% Annualized FTE Enrollment 8,028.19 7,649.20 -4.7% 7,648.84 7,708.79 0.8% 8.896.27 0.0% Fall FTE Student/Fall FTE Faculty Ratio 19.2 17.0 19.2 <u>\$4</u>,338 \$6.454 4.0% Net Tuition Revenue per FTE Student* \$5.657 \$4.139 -26.8% \$4.306 0.7%

*Undergraduate academic year tuition revenue less institutional aid/annualized undergraduate FTE enrollment. Note: this estimate may include aid awarded to graduate students.

Overview: In January 2020, IUP first submitted a five-year financial sustainability plan based on realistic enrollment projections and reductions in expenses through employee attrition and other operating reductions to ensure we met full financial stability in the five-year period. This was considered an achievable plan for IUP unless there were unforeseen circumstances that would arise to dramatically change the enrollment projections. That unforeseen circumstance took place with the coronavirus pandemic. IUP's enrollment declined significantly more than previous projections. Updated plans were submitted via CPP documents in June 2020, September 2020, a mid-year report in February 2021, September 2021, and a mid-year report in February 2022, describing more aggressive steps to reduce expenses. We have implemented the plan, which has been quite painful for the university. We estimate that we are two-thirds of the way to financial sustainability in the E&G budget, with the most significant challenges remaining in the Auxiliaries budget. As shown in this CPP submittal—which IUP labels September 2022 CPP (V10c)—the E&G budget is structurally balanced over three years, reducing expenses each year. Much of the expense reduction will come from net attrition to reduce workforce. In the first and second years, one-time sources are used to fill the remaining gap, with reliance on one-time sources decreasing each year. Enrollment is projected to stabilize during the same period, with a very slight increase (less than one percent) by the end of the period. The steps being taken to balance the E&G budget will also achieve the required student faculty ratio.

The Auxiliaries budget is much more challenging, driven primarily by debt payments. Operating expenses have been cut as much as possible. The projected annual shortfalls in the Executive Summary Chart are solely due to the (as yet unresolved) Auxiliaries shortfall. More aggressive measures, including taking legal action to relieve debt obligations, are currently being explored. For now, this document does not balance the Auxiliaries budget and will be updated as specific next steps are identified.

Summary of Approach: In this September 2022 CPP (V10c), prior to budget balancing strategies are implemented, IUP has about a \$20 million structural deficit in the E&G budget. During the first two years of this plan, permanent and short-term strategies will both be used to achieve structural balance by Year 3. The short-term strategies will include use of one-time reserves and other one-time funds, such as carryover balances, to balance the budget. Long-term strategies include reducing consulting contract expenses, utilities consumption and utilities expenses, workforce by net attrition, and in other operating expenses. The workforce reduction targets are

aggressive but within reach based on usual patterns of employee departures, with modest replacements. Departures are not strategic so we will continue to review and modify organizational structures, deploy appropriate technology, and revise and replace work processes to be student-centered, efficient, and effective. Should revenue increase beyond projections, due to enrollment or other factors, less aggressive workforce reduction targets may be possible.

CPP Part 4 on Academic Strategies will be submitted later, but steps are already in progress to enhance efficient management of the academic program array, with recently appointed Provost Luetkehans leading the deans and faculty to set and achieve appropriate enrollment goals, making more consistent use of technology and tools.

IUP's auxiliaries will have an estimated \$8 million structural deficit in the September 2022 CPP (V10c). This deficit poses more challenges and complexities because the housing inventory is comprised of both IUP-owned housing and affiliate -owned (Foundation for IUP) housing. The occupancy rate across all of the residential housing is below an average of 60%. FIUP has re-structured debt recently in 3 of 4 phases of the affiliate housing, which allowed IUP to enter into a master-lease arrangement with FIUP regarding the housing for those respective phases. However, there is still one phase that is not likely to be restructured before the FIUP defaults on the debt payments. In addition, IUP holds large outstanding bond debt on IUP housing and dining, which greatly contributes to the auxiliary deficit. One-time funds available from IUP's \$12.3 million share of the \$125 million appropriated in FY 2022-23 will likely be used to help address the challenge, but additional long-term strategies and perhaps outside assistance will be needed. More details regarding the auxiliary area at IUP is outlined in the auxiliary section.

IUP understands that it will take strength, commitment, and mindful leadership to work through all the implications of the CPP to be sustainable. As a result, IUP will be better and stronger. Data and projections shown in the CPP are conservative and based on analyses in which there is a high level of confidence.

Part 1: Strategic Goal Narrative

Complete one page for each of the university's top three strategic goals and the strategies used to achieve them in a financially sustainable way, including expected outcomes for specific student populations.

Please note whether the goal item is new or continuing from prior CPP submissions. Continuing goals should describe status against outcomes in the narrative below.

- Enrollment stabilization and/or growth including anticipated sources of new enrollments as well as improvements in student success (e.g., measured in 1st-2nd year retention and 4- and/or 6-year graduation rates).
- Diversity, Equity and Inclusion including anticipated sources of new enrollments as well as reductions in URM attainment gaps (measured in 1st-2nd year retention and 4- and/or 6-year graduation rates).
- Sustainability universities that have not balanced their revenue and expenditures for the current year should include a specific financial sustainability goal.

IUP's Strategic Plan for 2020-25 is designed to transform the culture at IUP to enhance the student experience by fostering exceptional student-centeredness. There are seven core principles in the strategic plan: 1) Every student is a priority; 2) Promote the search for, production of, and dissemination of knowledge for the benefit of our students and society.; 3) Provide a wide range of intellectual and professional opportunities for students that will assist them in developing their potential for becoming productive and responsible citizens; 4) Construct an environment of respect that encourages the growth of diversity, equity, and inclusion; 5) Respond to students and their needs when and where they are to enhance student satisfaction; 6) Design and reengineer processes and procedures logically to improve ease of use for students; and 7) Improve communication, collaboration, and engagement across the university, and with our alumni and community partners.

There are also five impact areas: 1) IUP Readiness; 2) Academic Success; 3) Finding and Creating Community; 4) Mental Health and Wellbeing; and 5) Post-IUP Success.

The President's 2021-2022 goals are linked to the strategic plan with the following focus areas: 1) Student centeredness and student success; 2) Growth of diverse, equitable, and inclusive community; 3) Research and graduate programs; 4) Communication, collaboration, and engagement; and 5) Sustainability. Each of these goals are interrelated. Activity and progress in one area will lead to progress in other areas. A similar structure for presidential goals will be used throughout the CPP period. Details are available at [https://www.iup.edu/president/goals/index.html]

New	X	$\neg \mid \overline{X}$	Affordability		Academic Program Array
		Х	Diversity/Equity/Inclusion		Workforce
Continuing	X		, , ,	l l	-1
Strategic Goal:		Be a	student-centered university.		

Strategic Goal(s) description and populations impacted:

- 1. The 2020-25 university strategic plan continues to provide a framework for a culture to enhance the student experience by fostering exceptional student centeredness. To help accomplish this task, a new infrastructure for student success is being explored that would be designed to positively impact students of all types and all levels at the university. This model would address the five major impact areas: IUP Readiness, Academic Success, Finding and Creating Community, Mental Health and Well-being, and Post-IUP Success.
- 2. The Crimson Scholars Circle was implemented in August 2021 with the goal of reducing the retention and persistence gap for Black and Brown students. This initiative employs both an early immersion and multi-year approach that provides academic skills, leadership and career development, peer mentoring, and student and alumni engagement. Participants are assigned a peer mentor and work closely with a team of professional staff and faculty who guide students throughout their four years at IUP. All students participating in the program receive a \$1,000 scholarship each year.
- 3. As an affordability strategy to reduce the cost of attendance, the university implemented a pilot housing scholarship program for 2021-23 offering a \$1,000-per-year scholarship for students residing in suite-style housing on the Indiana campus. All students living on campus in suite-style housing benefit from this scholarship.
- 4. Renewable, merit scholarship awards were increased for the 2022-23 academic year. IUP has invested over \$16M in support of student scholarships.
- 5. A workgroup has been established, co-chaired by the vice presidents for Administration and Finance and Enrollment Management, and made up of staff, faculty, and students to review all aspects of affordability for our students. A result of this work was that IUP proposed, and was subsequently approved by the Board of Governors (March 2, 2022), to change our pricing structure for in-state, undergraduate students from a percredit pricing model to the Board-approved tuition pricing. This change has reduced the cost of attendance for these students and promotes students enrolling in more credits per semester (if academically advisable). Not only does this allow students to take more credits for a lower price, it will help students graduate in a more timely fashion as a result of the higher credit loads. The workgroup that proposed this change is also undergoing a review of all student fees, out of state, undergraduate pricing, and graduate pricing.

Anticipated/Achieved student success, DEI, or financial sustainability outcomes:

- 1. The University Strategic Plan will provide the infrastructure to address the success of each student to enhance retention/persistence, increase credit completion ratios, and increase graduation rates.
- 2. The first cohort of the Crimson Scholars Circle experienced a fall 2021 to fall 2022 retention rate of 60% compared to a retention rate of 47.14% for the control group consisting of similar students who did not participate in the program. The average cumulative GPA for program participants was 2.04 compared to 1.94 for the control group.
- 3. An analysis of the current outcomes of the housing pilot suggest that the program has positively influenced students' decision to reside on campus. The number of new and returning students residing on campus have increased over the past two years. The additional auxiliary and E&G revenue would likely not have been realized without the program. The program will continue for 2023-24 and will be re-evaluated to determine the future of the program beyond spring 2024.
- 4. Approximately 93% of our admitted, first-year, first-time, undergraduate students were offered a merit scholarship. Additionally, new transfer students were awarded merit scholarships as well. The yield from admission to matriculation increased and melt from deposit to matriculation decreased. We have a higher freshman class enrolled in fall 2022 than in fall 2021. It is anticipated that we should see an increase in new student enrollment and strong retention and persistence.

Strategy funding and resources:

- 1. Identified groups across the university will convene in fall 2022 to brainstorm and discuss possibilities for the infrastructure of the new strategic plan, to include funding and resources, with an anticipated proposal submission to cabinet in December.
- 2. The funds for the Crimson Scholars Circle program were provided by an anonymous donor for Year 1 and 2 while additional funds will be secured for years 3 and beyond.
- 3. E&G funds were used to cover the cost of the \$1,000 housing scholarship.
- 4. University endowment, Foundation, and E&G funds are funding the increased merit-based scholarships for students.
- 5. IUP's recent implementation of undergraduate in-state tuition from the per-credit pilot model to the standard undergraduate in-state tuition rate and structure demonstrated IUP's ability to change course for the benefit of its students. This change was effective July 1, 2022.

Multi-campus and Systemwide implications, if applicable:
Addressing cost of attendance will impact students at all of IUP's regional campuses.

Continuing				
Strategic Goal:	Embrace the	e identity and value of IUP	as a dod	ctoral research university

Strategic Goal(s) description and populations impacted:

Research and scholarship are a foundational part of IUP's culture. We provide our students with opportunities at the undergraduate, certificate, masters, and doctoral level. Grants and sponsored project funding from federal, state, local, foundation, and corporate partners provide many opportunities for IUP faculty, staff, and students.

The identity and reputation of a doctoral research university provides increased awareness for prospective enrollments, stronger engagements with alumni/donors, corporate partners, and federal, state, and local funding agencies, and impactful collaborations with other institutions of higher education and research institutes.

Key populations are current students, students looking for bachelor's, master's, certificate, and doctoral programming, corporate and foundation partners, alumni and community partners, and research partners around the world.

Anticipated/Achieved student success, DEI, or financial sustainability outcomes:

Outcomes from this goal will help increase degrees awarded. Research experiences and high-quality instruction provide transformational learning experiences and pave the way for post-IUP opportunities for our students. Outcomes also included the ability to obtain external sponsored project funding to support the work of our faculty, staff, students, and the institution. IUP has developed a university-specific metric related to research and doctoral degrees awarded.

In 2022, IUP achieved R2—doctoral university, high research activity—designation in the Carnegie Classification System, making IUP just one of 99 US public institutions with this distinction. Despite declines in faculty FTE, in FY 21-22 IUP saw growth in sponsored projects activity and received \$10.4M in awards (up from \$9.3M in FY 20-21 and \$8.2M in FY 19-20). The largest growth was in federal awards, which led to an increase in F&A recovered (\$1.16M, up from \$956K in FY 20-21 and \$676K in FY 19-20). Submission of large (+\$1M), collaborative (multi-PI) grant applications was also prioritized, including increased collaboration between IUP divisions and with Indiana Regional Medical Center.

Ethical conduct of research continues to underpin our work and IUP remains fully compliant with all governing regulations.

A new three-year MOU between IUP and the IUP-research institute (IUP-RI) was signed and costs for service were stabilized by the expansion of IUP-RI services to Commonwealth University of Pennsylvania and Penn West. This expansion allowed the IUP-RI to add personnel, thereby increasing the breadth and depth of expertise and services provided to all institutions served.

With respect to graduate education, IUP continues to undertake a systemic review and update its graduate policies to ensure they are student-centered, fair, and support timely degree completion. Select successes of this initiative include revision of the time-to-degree policy, an overhaul/simplification of rules governing dissertation committee membership, and improvements to the timeline by which prospective graduate students receive financial aid award letters. IUP held inaugural "summits" to convene graduate program directors, deans, and the provost for identification of opportunities for program improvement, efficiency in program delivery, and shared problem-solving. A joint APSCUF-Management work group was also convened to make recommendations about IUP's faculty Alternate Workload Assignments (AWAs). The outcome was a directive to streamline the AWA request/approval process and dramatically increase accountability, regularize AWA for graduate program directors based on a formula that takes into account headcount and FTE and provides summer compensation to all master's and doctoral program directors, and clarify the "stackability" of AWA for performing different activities.

Strategy funding and resources:

The cabinet, along with the University Budget Advisory Council, will continue to review revenues and expenditures to ensure funding of university priorities.

The State System appropriation allocation formula includes a portion for the doctoral research component and IUP invests significant additional resources above and beyond that.

Multi-campus and Systemwide implications, if applicable:

This goal supports IUP's legislated niche as a doctoral university. It further supports IUP's role in providing expertise in sponsored research administration to multiple PASSHE institutions.

Strategic Goal:	Chan	ge IUP's culture to embrace and pro	omote diversity, equity, and

Strategic Goal(s) description and populations impacted:

- (1) Professional Development and skill building for faculty in supporting a diverse student body. We held a DEI Summer Academy in June 2022, for 63 faculty to gain skills specific to effective curricular delivery and academic support for students from marginalized demographics. The academy provided training and will be followed this academic year with teaching circles to grow our proficiency to retain Black and Brown students. These faculty are now in positions to train others.
- (2) We launched the Building Skills for Success in a Diverse Global Community Certificate program in August 2022. This certificate program pairs the existing model for the Creating College Success program with co-curricular requirements to engage first year students from a lower-retention demographic to promote a sense of belonging to boost their success and retention. Co-curriculars include attending programs and workshops with DEI content and joining student organizations in combination with academic skills development.
- (3) Arts Programming. IUP has brought emerging regional BIPOC artists to campus to collaborate and perform. These partnerships provide opportunities for students to perform and experience culturally diverse pieces and roles modelling excellent and achievement and influencing culture to value diverse voices. With our Library DEI speaker series and a Native American LGBTQIA film screening, these influences are expected to promote opportunity and a sense of belonging to Black and Brown and other students. We are partnering this with a strategy to apply direct support from student groups such as Students Against Racism, IUP NAACP Chapter, Latino Student Organization, and others to connect and mutually strengthen attendance and participation.
- (4) Support for University Enrollment Management through the Office of Admissions to recruit minority students (predominantly Black) to campus by bus. These students spend the day and are better able to see themselves as college students at IUP. This year, we are expanding this initiative to bring students from Latinx schools as well. We will have more interactive experiences for the high schoolers so the develop a strong connection to the campus and campus partners and see how they could achieve their educational and life goals.

- 1. This investment promotes academic success which directly affects retention and success goals. We are collecting data to measure outcomes.
- 2. This initiative pairs academic and co-curricular learning to engage students to promote retention and success.
- 3. This initiative nurtures and fosters a diverse, inclusive culture, imparts a sense of belonging, models minority excellence, success, and achievement, and builds regional reputation for IUP as a leader in DEI. Outcomes are difficult to separate out for retention, but we will measure participation both in student organizations and participation/attendance at programs.
- 4. Outcomes will be measured by recruitment numbers, but growing the number of Black and Brown students who matriculate and helping them get a strong start boosts retention by promoting clearer understanding of support options, a greater sense of belonging that instills confidence, and lessens homesickness and imparts the knowledge that IUP wants these students and invests in them even before they arrive.

Strategy funding and resources:

Strategic Goal:

- 1. Investment was \$228,000. Funds were used to pay for the external facilitator, student workers, faculty stipends, faculty benefits, and demonstrate the investment in our faculty toward our retention and success goals.
- 2. Investment is expected to be \$5,000. Funds will pay for materials and costs of programs as well as an awards ceremony in spring 2023. We are collecting data to measure outcomes.
- 3. Investments have been \$10,000 and will continue.
- 4. Investment has been \$ 1,200 and will grow this year.

Multi-campus and Systemwide implications, if applicable:

For Initiative #1: The DEI Summer Academy model could benefit all PASSHE campuses and could be jointly conducted and funded.

For Initiative #2: The DEI certificate program could be adopted at other campuses.

For Initiative #4: This recruitment strategy can apply everywhere. The PASSHE System could also host recruitment events where all campuses can participate as a system to allow families to see the range of options the state system has to offer. This strategy was employed in the past for recruitment in areas with Latinx/Hispanic predominant high schools.

Part 2: Enrollment Projections Used for Revenue Assumptions

Provide a brief description of the university's realistic enrollment projections for the projection period. To provide greater understanding of all enrolment projections, all universities are requested to provide information regarding categories noted below (New Enrollment, Retention, and Net Tuition Revenue).

For universities projecting an increase in enrollment:

1. A supplemental exhibit of enrollment projections by class level must be provided to outline where increases are anticipated (see supplemental exhibit), including rationale for the projections and what the university is doing to achieve those projections by student segment and relevant new enrollment and retention data.

Enter the narrative describing the rationale for enrollment trends and projections within the following categories below:

- Fall Undergraduate and Graduate Enrollment (First-time, transfer, and continuing):
- Second-Year Persistence Rate:
- Six-Year Graduation Rate:
- Net Tuition Revenue:

For those universities projecting overall enrollment growth, enter the narrative describing enrollment increase assumptions, including supplemental enrollment chart from the CPP workbook.

Enrollment Narrative

A Tuition Model and Pricing Workgroup comprised of administrators, staff, faculty, and students has been established to address affordability at IUP. This workgroup, co-chaired by the Vice President for Administration and Finance and the Vice President for Enrollment Management, is charged with promoting affordability by providing financial resources to lower the cost of education and exploring cost-reduction strategies. As part of this work, the workgroup is concentrating on the following initial areas: in-state undergraduate tuition, student fees, out of state undergraduate tuition, international tuition, graduate tuition, and room and board.

To date, the committee put forth a recommendation to President's Cabinet and the Council of Trustees to change the pricing structure for in-state undergraduate students from a per-credit pilot pricing model to the standard, board-approved tuition pricing. On March 2, 2022, this proposal was approved by the Pennsylvania Board of Governors to be effective fall 2022. Though this was implemented late in the admissions cycle for fall 2022, initial results have been promising.

New First-Time Undergraduate and Transfer Students

The percent change in Pennsylvania undergraduate first-time student admission applications received for the period of March 2, 2022, to the end of this admission cycle (after the new tuition pricing structure was approved) was higher than in any of the past four years during this same period of time. Similarly, the percent change in net tuition deposits was also higher than in any of the past four years during this period. In addition, we had an increase in our yield from admitted to registered that was almost two percentage points higher than fall 2021. This increase in yield, based on our admitted student pool, is equivalent to approximately 149 additional students

registering for fall 2022 than if at the fall 2021 rate. Melt from gross tuition deposit to registration improved as well, by 3.05 percentage points as compared to fall 2021

Applications for our new Pennsylvania transfer students showed promising results as well, with a larger percent change in applications for the period of March 2, 2022 to the end of cycle than in any of the past four years. Current scholarship awarding does not appear to be moving the yield to registration in a way that was anticipated, though our transfer enrollment is slightly ahead of fall 2021. We will be addressing this with a modest increase in transfer scholarship levels. Additionally, we are continuing our partnerships with a few Pennsylvania community colleges, offering a dual-admission opportunity for students who meet the qualifications while at the community college. We currently have one partnership formally completed and two that are in the process of being ratified.

The percent of the market share of total high school graduates that registered at IUP for the fall 2022 semester is preliminarily at 1.32%. This is an increase over fall 2021 of 0.04 percentage points. We had a particularly large increase in the Pittsburgh demographic market over, not just fall 2021, but over the past six years. Given our location, re-capturing this market is an important component of our success.

IUP continues to deploy scholarship and institutional aid strategies to address student affordability through providing scholarship and grant assistance to our students. Through the success of the Imagine Unlimited Comprehensive Campaign, along with an increase in the allocation of institutional (E&G) support by the university, we provided more than \$16 million in grant and scholarship support to both new and continuing students at the undergraduate and graduate levels. In fall 2022, more than 93% of our new first-time undergraduate admitted students were offered renewable scholarships or grant dollars to help defray their cost of education and scholarship award amounts were increased across the board for new first-time students. The yield from admitted to registered for these students was 22.2%, similar to our overall yield, in light of the high percentage of students who received the scholarship offers and it exceeded the scholarship yield for fall 2021, which was 19.9%.

Fall 2023 and fall 2024 new first-time and transfer undergraduate student projections take into consideration the following:

- An increase in the applicant pool of Pennsylvania residents, based on the growth we experienced after the announcement of
 the new tuition rate for in-state, undergraduate students. In addition, we have allocated additional marketing dollars to
 increase our visibility in the Pittsburgh demographic market (our "backyard") as well as a small increase in marketing dollars
 for the Philadelphia demographic market.
 - To date, for fall 2023, our applicant pool for in-state students is showing an increase in applications of 15% and an increase in completed applications of 22.3%.
- A stabilization of our yield from admit to registered, as well as our melt rate from gross deposits to registration.
- Slight growth then stabilization of our new transfer students. For fall 2023, though the numbers of transfer in the funnel are very small at this point in the cycle, we are seeing an increase in our transfer applications.

Continuing, Undergraduate Students

As mentioned earlier, the merit scholarship awards that are being offered to students are renewable. This is an effort to help students retain and persist. We did see a decline in our fall 2021 cohort of new first time undergraduate degree-seeking student retention from fall 2021 to fall 2022 as compared to the fall 2020 cohort to the fall 2021 semester. One anomaly that was detected was the number of students who were dismissed from the fall 2021 cohort, which was significantly higher than in the past four years. While the impact of the COVID-19 pandemic may have had an impact on this number, we are in the process of analysis to determine if there were other factors that we can influence going forward. A positive outcome that we saw for the fall 2021 cohort is that, of those students who were not dismissed, we had a higher percentage than in the last four years who registered for fall 2022.

We did see a slight growth in the persistence of students of approximately one percentage point over last year. The calculation for persistence that is used in projections is determined by using the number of continuing non-freshman cohort students re-enrolled students and transfer students attending in fall and the percent of that number that continues into the next fall. Unlike traditional persistence calculations, this enables us to capture transfer students and re-enrolled students moving to the next year. While this is not the standard measure for persistence, it has been a fairly stable way to get a more granular expectation of our continuing students in projections. For example, in fall 2022, the projection for continuing student persistence was 3,213. We are currently at 3,204 (99.99% to projection). Additional positive outcomes that we are seeing in fall 2022 is a higher percentage of undergraduate and graduate students who are registered full-time as compared to last year and undergraduate students taking a higher credit load as compared to last year. Both support our efforts towards reducing the time to degree for students.

Pro-active outreach was provided for continuing undergraduate and graduate students who were not registered for fall 2022 and had registration holds due to balances due, but who were academically eligible to register for fall 2022 beginning at the point when registration for fall 2022 was open for students. There were 292 students who were offered a grant to help with their registration holds. Of those 292 students, 269 registered for fall 2022 for an 92% yield rate. It is our intention to begin this work earlier by identifying students who have missed payments on their payment plans and financial aid will continue their outreach to students missing financial aid documents.

Supporting all of the efforts to increase retention and persistence, as well as recruitment, a new infrastructure for student success is being explored, that would be designed to positively impact students of all types and all levels at the university. This model will address the five major impact areas including IUP Readiness, Academic Success, Finding and Creating Community, Mental Health and Well-Being, and Post-IUP Success.

Fall 2023 and fall 2024 continuing student projections (retention and persistence) take into consideration the following:

- A slight increase in retention because of "lessons learned" from the dismissal rate of our fall 2021 cohort and appropriate intervention.
- Continuing to calculate the number of continuing students using the methodology utilizing historical patterns, but allowing for slight growth as a result of our efforts toward affordability and registration.

Graduate Enrollment

International student uncertainty from the COVID-19 pandemic continues to be reflected in this comprehensive plan, and we projected no new international student enrollment at the graduate level. Graduate recruitment and enrollment are a significant focus of the university and we have made investments in our new graduate student recruitment methodology, as well as an emphasis on graduate student progress towards graduation. The graduate admissions staff now includes two admission counselors in addition to the graduate admissions director, who was the only professional staff member in the unit. These positions support the efforts of graduate coordinator faculty by utilizing current and effective best practice recruitment strategies to increase the number of inquiries and prospective students (i.e. building the "top end of the funnel"), providing additional personalized outreach to students in the admission pipeline, and working with Marketing and Communications to build effective marketing campaigns. The intention is to improve yield rates from application to decision, admitted to confirmed, and confirmed to enrolled with a larger pool of inquiries and prospects. The counselors began their work in January 2022, impacting summer and fall 2022 recruitment efforts. New outreach efforts from the "inquiry" to the "application started" phase, as a result of their work, saw a 4% lift over fall 2021 (72% vs. 68% progressing to the "application started" phase).

Additionally, the graduate admissions office has worked directly with the School of Graduate Studies and Research to consult about the most effective use of graduate assistantships and scholarships to improve the yield from admitted to enrolled, and to create a method of ensuring that all available funding to support this effort is fully utilized and communicated to students earlier in the recruitment cycle to have full impact. This partnership, which also included the Office of Financial Aid, resulted in earlier financial aid packaging for new prospective graduate students that included scholarship and GA offers and new outreach campaigns to build relationships earlier with prospective students.

To date, the fall 2022 enrollment for graduate students did not meet anticipated results. The admitted-to-registered yield dropped from fall 2021. While we do know that some programs do not recruit every year, that is taken into consideration in projections; however, there were a couple of programs that did not recruit, which was not anticipated. Also not anticipated was the "COVID fatigue" reported by some disciplines, directly impacting enrollments of working professionals in related programs.

Fall 2023 and fall 2024 graduate student projections take into consideration the following:

Projections going forward have been developed based on the likelihood to meet goals due to a newly established system, in coordination with Academic Affairs, to set targets for enrollment in programs. The collaboration with Academic Affairs and the deans has been built to foster an open dialog about the recruitment progress. Coordinators have also had their responsibilities for recruitment and retention more clearly defined and have been given additional flexibility to manage these duties on a year-round basis. The added layer of recruitment support via admissions counselors should help create capacity for outreach and assistance to current graduate students by departments, to enhance persistence to graduation. Projections continue to take into consideration cyclical recruitment cycles and the current levels of enrollment in all of the programs.

Clock Hour Programs

IUP is among the few institutions in PASSHE to offer programs on a clock-hour basis, including our American Language Institute (ALI), Academy of Culinary Arts, Criminal Justice Training Program, Paramedic Program, Emergency Medical Technician (EMT) training, and School Security Personnel (SSP) Basic Training Program.

Fall 2023 and fall 2024 clock hour student projections take into consideration the following:

While the headcount of students in clock hour programs has increased in FY2022-23, we are using a conservative projection of fewer students going forward but stability over the next two years beyond fall 2022. This is due, in part, to the increased number of students in the ALI program, which may not be predictable, given international enrollment fluctuations.

Re-Enrolled Students

Efforts are being employed to re-enroll students who entered IUP but were not able to complete their studies due to life circumstances such as financial barriers, family commitments, uncertainty of career choice, military deployment, and various other reasons. We are encouraging students to return and complete their degrees at IUP in a more systematic and centralized manner. In support of this effort, a staff member in Enrollment Management has been assigned as the university lead in these efforts, coordinating the needs of students who would like to return to IUP with the resources needed to accomplish this goal. Focusing our work in this area will be a positive move toward continued enrollment success. With our own outreach activities, coupled with those of the consulting firm ReUp, we are not only re-enrolling students who have left the university but, perhaps as importantly, learning what students may need to reenroll, such as access to more online courses or a wider variety of online programs, access to certificates versus a degree, or job training courses to help them move through their current fields of employment. While the fall 2021 enrollment for this group exceeded projections in the CPP, we did not see the same growth in fall 2022. Enrollment Management is collaborating with Academic Affairs to determine which programs students could potentially re-enroll in and complete their degrees completely online. Successfully identifying more options for students should result in increased re-enrollment in the future. This strategy will be carefully vetted during this academic year.

Fall 2023 and fall 2024 re-enrolled student projections take into consideration the following:

Our projections for this group indicate slight growth due to collaboration with academic affairs on available courses by interest and mode of instruction and then stability in headcount.

Dual Enrollment

High school students may apply for dual enrollment at IUP. Dual-enrolled students may select online or on-campus courses at the Indiana, Punxsutawney, or Northpointe campuses. Historically, only students who attend a high school within a school district that has an active dual enrollment agreement would receive a 75% tuition discount; however, we have expanded this discount to all high school students.

An average of 55 high school students have taken advantage of dual enrollment courses over the past three fall semesters. Additionally, over the past three years, an average of 48% of students who are admitted to IUP who have previously been enrolled in dual enrollment courses at IUP have matriculated as new freshmen. We have been diligently working with school districts and community-based organizations to not only encourage dual enrollment, but to create intentional pathways for dual enrollment students to enroll for courses at IUP. Historically much of our dual enrollment work was with local school districts but with the new pathways and partnerships that we have been building, the geographic reach has been expanded. The fall 2022 enrollment of dual enrollment students exceeded CPP projections and, at 92 students this fall, has exceeded any enrollment since 2009. Enrollment Management will continue to work with Academic Affairs regarding seat availability in face-to-face courses and space in on-line courses, which will be imperative for any substantial growth in this population.

Fall 2023 and fall 2024 dual enrollment student projections take into consideration the following:

Projections for the comprehensive plan are conservative and reflect a stable but slightly growing dual enrollment population.

Part 3: Financial Projections Overview

Within the E&G, Auxiliary, and Net Asset sections below, provide additional detail related to the projected revenue and expenditures and impact on the overall university projected operating results.

- 1. If the university is projecting a negative result and requires reserves to balance during this projection period, describe the level of reserves and the actions to be taken to reduce the reliance on reserves and indicate if this plan changes the Primary Reserve health level outlined in the Sustainability Procedure. Note: The university target is 40 percent in primary reserves per the Sustainability Procedure.
- 2. For universities with housing occupancy below 70 percent and associated outstanding debt, within the Auxiliary section, provide a plan which addresses occupancy, any associated housing debt, and long-term sustainability.

Financial Overview - Includes E&G and Auxiliary Projections:

Describe the E&G financial projections:

- 1. If the university has a deficit, please describe the strategies to address this gap.
- 2. If the university has a balanced budget without reserves or has a surplus, briefly describe (1) planned new expenditures (2) transfer for strategic investment or (3) increase in reserves to improve sustainability.

Revenue: A combination of changes, including the State System tuition rate assumptions (1% versus flat), the discontinuation of the per-credit model for in-state undergraduate students by moving to the standard undergraduate in-state pricing structure, which was anticipated to result in an estimated potential decrease of more than \$8 million, and lower enrollment projections for certain populations of students as well as lower retention (as noted above in the enrollment section) resulted in \$14 million less in tuition revenue than projected last September for the current fiscal year.

	FY2022-23	FY2023-24	FY2024-25
Fall Headcount - Sept. 2021	9,112	9,255	
Tuition Revenue Sept. 2021 (millions)	\$82.7	\$85.2	
Fall Headcount - Sept. 2022	8,559	8,570	8,635
Tuition Revenue Sept. 2022 (millions)	\$68.8	\$68.9	\$69.4
Change in Fall Headcount	(553)	(685)	
Change in Tuition Revenue	(\$13.9)	(\$16.3)	

Above data excludes clockhours

Appropriations include the \$75 million increase to appropriations for FY2022-23 and a two percent increase for FY2023-24 and FY2024-25.

Tuition revenue for FY2022-23 through FY2024-25 now reflects the discontinuation of the per-credit pilot for full-time, in-state undergraduates which was approved by BOG in March 2022. IUP had anticipated a revenue decrease of more than \$8 million in Year 1 under the new flat rate model. This change was implemented in the middle of the spring semester, late in the admissions cycle. This late change in the tuition model for in-state undergraduate students gave IUP little time to experience the full enrollment impact of this tuition reduction for our students. As part of the approval process for that change in the tuition model, the university set aside one-time funds from lost revenue claimed under HEERF III to supplement the bottom line for this revenue reduction in FY2022-23, estimated at \$5 million as part of the overall strategy.

Total change in revenues from last fiscal year to FY 2022-23 is \$ 28.5 million and 14.5%, for educational and general funds, with some of that change in revenue as a result of the one-time COVID funds received last fiscal year. Excluding one-time funding from COVID, the revenue change from last fiscal year to FY 2022-23 is \$13.8 million and 7.6%.

Expenditures: Expenditures have reduced overall from last fiscal year's amount of \$183 million to \$179.7 for FY 2022-23 by \$3.3 million and 1.8% for educational and general funds. Net assets have shifted from \$79.4 million for last year to \$67.1 million for FY 2022-23, which equals a change of \$12.3 million or 15.5%. Cash balances reduced from last year's amount of \$75.8 million to \$63.5 million for FY 2022-23 for a total amount of \$12.3 million, which is a 16.2 percent reduction.

- · Personnel expenditures have been updated to include personnel changes confirmed through mid-August.
- CBA and benefit assumptions have been updated based on the State Systems assumptions.
- When compared to FY2021-22, the projected student/faculty ratio for FY2022-23 is expected to increase from 17.0 to 17.7. Through anticipated net attrition and turnover this ratio will further improve over the last two years of the plan. We are expected to meet our required ratio of 19.2 by FY2024-25.
- Operating expenditures were reviewed and updated.
- Details below in bottom line section.
- Annual primary reserve ratio was 34% in FY2020-21 and 36.3% in FY2021-22.
- Minimum reserves ratio has increased from 159 to 173, primarily due to the one-time lost revenue claimed under HEERF
 III.

Bottom Line and Budget Balancing Strategies:

Bottom Line: Based on updated revenue and expenditure projections, IUP was projecting approximately \$20 million shortfall for all three years of the plan. This structural deficit amount is prior to implementing additional budget balancing strategies.

<u>Budget Balancing Strategies:</u> Various one-time and permanent balancing strategies were reviewed and analyzed. IUP has submitted a balanced budget for all three years of the plan through a combination of one-time and permanent budget reduction strategies. The first two years of the plan will need to rely on both one-time and permanent strategies so that IUP has adequate time to implement permanent reductions. By the end of FY2024-25, the university relies on permanent budget balancing strategies only.

<u>One-time strategies:</u> To balance the FY2022-23 budget we have implemented one-time budget balancing strategies totaling \$13 million. IUP had anticpated a decrease in revenue from the implementation of the flat-rate model and set aside approximately \$5 million in one-time lost revenue claimed under HEERF III to aid in balancing the current year budget. The university is currently reviewing and analyzing our accounting structure, with a focus on the designated funds with balances rolling forward from year to year with little to no activity in these accounts. We have committed to identifying approximatley \$2 million of one-time account balances from designated funds and reserves to aid in balancing the current year budget. Prior year budget carryover is approximately \$6.4 million and will be used as a one-time supplmental resource to balance the FY2022-23 E&G budget.

<u>Permanent strategies:</u> In addition to the approximately \$13 million in one-time strategies, we have also identified \$6.2 million in permanent budget savings to balance the current year and future year budgets.

Since FY2018-19 IUP has reduced workforce by approximately 349 FTE and \$31 million in salary and benefit savings, which include budgeted increases resulting from CBA increases and benefit assumptions. These reductions were painful, yet necessary, to help us achieve financial sustainability.

For this September 2022 CPP (V10c), IUP has implemented additional personnel reduction targets in all three years of the submitted plans. These targets were implemented based on historical turnover and pro-rated by bargaining unit/employee group, excluding turnover in most recent years that was due to furloughs and retrenchments as these years would have skewed the average turnover. The target savings is approximately \$5.2 million annually over all employee groups. The cumulative savings from these targets resulted in \$5.2 million in FY2022-23, \$10.8 million in FY2023-24, and \$16.5 million in FY2024-25. As we work toward developing a plan, we expect that the savings from attrition may vary by bargaining unit or employee group compared to this plan. Although the targets were set based on historical turnover, we are also in the process of reviewing budgeted vacancies with the expectations that savings will also be achieved by not filling current vacancies as well as only filling future vacancies which are deemed critical positions. The hiring of temporary faculty has been under review and in conjunction with the division of Academic Affairs may be an area to explore additional savings opportunities. IUP is also analyzing AWE's, LWOP's, and other categories to reduce expenditures and/or more fully utilize existing resources.

After implementation of the pilot utility savings program during the summer of 2022, IUP experienced positive financial results. The program included more efficient use of instructional buildings for the summer and consolidating where classes were located, as well as implementing best practices regarding temperature settings and a four-day week for some employee groups. Based on initial assessment, we are confident that as we refine the processes for the utility savings program, this will result in \$500k of utility savings annually. IUP is also reviewing our consulting contracts and anticpate another \$500k in permanent savings from this initiative after the review is finalized and implemented.

In order to balance FY2023-24, we will still have to rely on one-time reserves and/or prior year surpluses in the amount of \$7.1 million.

The FY2024-25 E&G budget submitted is balanced by permanent budget balancing strategies and not relying on one-time funds. Cumulative personnel savings in the amount of \$16.5 million is the largest contributor to the balanced budget. We have also planned for a operational savings target of \$1.9 million. Over the next few years, IUP will focus on identifying additional operational areas to reduce expenditures. Some of the areas to be analyzed further include the Center for Health and Well-Being, further review of consulting and other large contracts, athletics, and other areas.

The housing scholarship program although only approved through FY2023-24 is included in E&G expenditures for FY2024-25 to be conservative. If this program is discontinued this could result in additional E&G savings.

Increasing utility commodity costs has placed financial strain on all universities in the State System. However, with the unique Cogeneration plant at IUP we have been able to hedge these increasing commodity costs with our participation in our three PJM revenue programs. Our increased runtime and participation in these programs has led to lower commodity costs per square footage when compared to other universities. We have also seen an increase in revenue from these programs and anticipate that this will continue.

Over this next year, IUP will begin the development of an updated facilities master plan, which will include taking a holistic look at IUP's space needs and utilization. It will entail developing a target for further reductions in campus footprint, consolidate spaces and programs together since some programs are fragmented across the campus, and utilize spaces more effectively and efficiently. It will also include identifying new program needs and incorporating planning around those new needs. Some of IUP's work on this will ensure that we utilize the Gordion reports and other data such as space utilization data to base recommendations upon. As part

of this process, it is anticipated that additional square footage will be identified to be taken offline. There may be some short-term savings associated with consolidation and better usage of space, but most of the solutions will be long-term.

Auxiliary revenues and expenses.

Describe the Auxiliary financial projection.

- 1. Universities with housing occupancy levels below 70 percent and associated outstanding debt must provide a plan which addresses occupancy, housing debt and long-term sustainability. Insert chart with housing data from the Charts for Narrative tab of the CPP template.
- 2. If the university has a surplus, briefly describe (a) new expenditures and (b) transfer for strategic investment, deferred maintenance, other.

Occupancy:

	Actual		Projected	
<u></u>	FY 2021-22	FY 2022-23	FY 2023-24	FY 2024-25
Average Overall Occupancy Rate	57.1%	59.6%	59.6%	59.6%

As noted above, IUP combined residence hall occupancy on the Indiana and Punxsutawney campuses is projected below 60 percent for all three years of the plan. As required in the CPP submission, the supplemental occupancy tab completed in the CPP workbook contains the details behind this occupancy.

Auxiliary Enterprises

Occupancy of Student Housing: As of September 12, 2022, housing occupancy at the Indiana campus is 64.63%. Foundation for IUP (FIUP)-owned housing is delineated into four phases. Occupancy within the three phases under a master lease agreement is as follows: Phase I, 35.92%; III, 62.43%, and IV, 78.38% as of September 12, 2022. Fall 2021 total occupancy, including the Indiana and Punxsutawney campuses, was 57.1%, this is projected to be 59.6% for fall 2022. Occupancy is slightly higher for fall 2022 compared to fall 2021 due to more new students living on campus.

We are projecting approximately an \$8 million annual structural deficit for all three years of the plan for our auxiliary units. This is consistent with the prior CPP submittals. We are exploring and discussing options to reduce this deficit; however, debt service remains one of the largest expenditures and, due to agreements in place with affiliates, options are very limited.

Off-campus student housing is abundant and is offered, for the most part, at lower pricing than on-campus housing. This further complicates the overall student housing situation at IUP.

<u>Bottom Line:</u> The IUP auxiliary budget is complicated due to the mix of affiliate owned and IUP owned housing portfolios, the overall occupancy levels, and bond debt that is higher than both housing and dining can afford. Unfortunately, IUP has submitted an auxiliary budget for all three years of the plan that is not balanced by year three of the plan.

Over the past few years, expenses were scrutinized and reduced significantly in both personnel and operating costs. Continued efforts are currently underway to address the shortfall which is largely due to a decline in enrollment leading to decreased student occupancy

and high debt service. The deficit for auxiliaries totals \$8.49 million for FY2022-23, \$7.68 million for FY2023-24, and \$7.65 million for FY2024-25. The auxiliary budget deficit is negatively impacting the IUP's financial metrics as shown in the tables above.

IUP entered into a master lease agreement with FIUP for Phase III in July 2022. The revenues and expenditures reflected in the above table have been adjusted to reflect this. Staffing expenses have been held steady. The full-time staff and student staff workforce reductions described in previous CPP versions remain in place.

Three years ago, IUP entered into master lease agreements with RRI for two other housing phases, Phase I and Phase IV, while Phase II remains in its current state. Unfortunately, recent efforts for Phase II debt restructuring have failed with the various parties involved, primarily due to Deutsche Bank making demands that were impossible to meet within IUP's finances. There are current legal agreements in place with IUP and its affiliates that limit IUP's ability to shift housing occupancy from various phases, set lower pricing structures, and IUP's ability to make decisions on other housing related matters. IUP's president and staff, with PASSHE legal counsel, are reviewing existing agreements and pursuing options to determine what additional flexibility is available to IUP to reduce costs and lower debt. These discussions are confidential at this time.

Whitmyre Hall, which is IUP-owned housing, has was closed in March 2020 when IUP, like all other PASSHE institutions, shifted to online instruction. Housing occupancy and associated revenue projections take into account the re-opening of Whitmyre Hall, which began in fall 2023.

The university implemented a housing pilot scholarship program for 2021-23 offering a \$1,000 scholarship for students residing in suite-style housing at the Indiana campus. An analysis of the current outcomes of this pilot suggest that program has positively influenced students' decision to reside on campus. The program will continue for 2023-24 and will be re-evaluated to determine the future of the program beyond spring 2024.

Although graduate students have always been permitted to reside on campus, additional marketing and programming efforts will be implemented in fall 2022 to increase the number of graduate students residing on campus in fall 2023 and beyond. Efforts include establishing dedicated wings within the residence halls for graduate students and marketing graduate housing in collaboration with Graduate Admissions and the School of Graduate Studies and Research.

Occupancy on the Punxsutawney campus is 34.34% compared to 33.33% in fall 2021. Although the dining operation was discontinued in fall 2021, housing at this location continues to operate at a loss. Occupancy must average at least 83% to avoid operating at a financial loss. The remaining debt service and low occupancy significantly contributes to an annual shortfall for this operation and the overall loss in the auxiliary enterprise.

Total dining revenue has increased slightly due to an increase in on-campus meal plans, which is directly related to the increase in fall 2022 housing occupancy on the Indiana campus. Off-campus meals plans have decreased more than 40% since fall 2019, and have decreased slightly for fall 2022 compared to fall 2021. This decrease in off-campus meal plans is a lingering result of the decrease in continuing students who lived on campus due to COVID over the past several years. These continuing students, who enjoyed meal plans while residing on-campus, are the population of students who typically purchase meal plans when they move off-campus.

The total number of dining venues on the Indiana campus were reduced in spring 2022. This resulted in lower dining operating expenses without compromising the quality of the dining program or the student experience. Meal concepts were consolidated and relocated to existing venues. The Provision on Demand (P.O.D.) convenience store was relocated from a residence hall to a smaller vacated retail dining space thus reducing the total square footage utilized by auxiliaries.

In summary, due to the complexities of the residential housing operations, agreements with affiliates, overall housing bond debt, dining debt, and lower occupancy levels and food service sales related to declines in enrollment, it has proven difficult to further address the budget shortfall. Discussions regarding strategies are being held with system staff, legal counsel, and others to determine what next steps IUP can take to reduce debt, lower costs, and close this structural deficit without harming our current or prospective students.

Unrestricted Net Assets – E&G and Auxiliary

Unrestricted Net Assets Chart

Estimated End of Year Balance in Net Assets/Total Expenses								
Estimated Minimum Reserves	159	173	n/a		n/a		n/a	
Unrestricted cash*365/total unrestricted expenses								

Describe the unrestricted net assets projections:

Our unrestricted net assets are projected to decrease from \$80 million to \$38.3 million by June 30, 2025. Cash balances are also projected to decrease drastically from \$84 million to \$42.3 million during that same time period.

The decline in unrestricted net assets is primarily due to two factors: The use of one-time reserves and one-time fund balances to balance the E&G budget during the first two years of the plan and the continuing deficit of Auxiliary revenues and expenditures for all three years of the plan.

1. Clearly state if annual revenue can cover expenditures within E&G and Auxiliary, and if not, how much the reserves are needed for E&G and Auxiliary deficits and if internal loans are planned.

Our continuing revenue does not cover expenditures for the first two years of the plan. In those two years we will be using one-time funds and reserves of \$13 million and \$7.1 million respectively. In regard to auxiliary deficits, the annual revenue does not cover expenditures for all three years.

If IUP is not successful in taking some of the aggressive measures we are currently exploring, auxiliary enterprise may likely need an intra-university loan from IUP's E&G during this reporting period. The university is currently assessing cash balances and will report more on this in the mid-year report.

2. If a university's reserves are below 40 percent, identify the projected impact on overall reserves and if/when reserves are scheduled to be exhausted with current projections.

Assuming no additional funds are set aside in reserve accounts, by June 30, 2025, unrestricted net assets are projected to decrease to \$38.3 million. This includes \$20 million in one-time and reserve funds to help balance the E&G budget for FY2022-23 and FY2023-24.

If E&G ceases to draw down on assets after FY2023-24, without a solution to the Auxiliary financial hardships these funds could be exhausted in under five years.

⁴ Actual results for University Financial Strength ratios should be input using the updated Financial Risk Assessments available in the BI portal, via ESS. Updated Metrics will be available beginning on September 2, 2022.

⁵ These ratios are calculated on an annual basis; ratios in the sustainability scorecard use a three-year rolling average.

⁶ Total Funds Raised: Grand total amount (outright gifts only) from the Voluntary Support of Education Survey. See Appendix B.

	FY 2021-22	FY 2022-23	FY 2023-24	FY 2024-25
Average Overall Occupancy Rate	57.1%	59.6%	59.6%	59.6%

AFFII IATES

TOTAL

Indiana University of Pennsylvania

Impact of Coronavirus Pandemic

The intent of this schedule is to capture the total impact the COVID pandemic has had at each university, including any lost revenues and/or expenses that will not be covered by stimulus funds or reimbursements from FEMA/PEMA. Figures for FY2019-20, FY2020-21, and FY2021-22 should be final and should be estimates for FY2022-23. This schedule should not include revenues or activities associated with \$50M of CSFRF the State System received in FY 2021-22.

Revenues and expenses related to emergency student and are reported separately at the bottom of this schedule. All other CARES Act, Coronavirus Response and Relief Supplemental Appropriation Act (CRRSAA), and American Rescue Plan Act (ARPA) funds appropriated to the university, along with any reimbursements anticipated from FEMA and/or PEMA (regardless of what fund they are recorded in), should be included in this schedule. Expenses should include any costs related to the COVID pandemic (e.g., payroll for student workers and eligible employee payroll costs; purchases of PPE, signage, COVID testing, and technology for distance education), savings realized from the suspension or renegotiation of certain contracts due to campus closures or reduced occupancy of students (e.g., dining or shuttle bus), and any other operational savings (e.g., utilities and travel).

E&G and Auxiliary Fee Refunds and Rate Reductions - these lines should include any refunds provided to students and/or reductions in revenues due to reduced fee rates.

Title V Funds - All expenditures funded by the Title V appropriation received from the Commonwealth were to be incurred by December 30, 2020 and should be reflected in the appropriate expenditure categories listed below.

Lost Revenues - Revenues lost as a result of reduced occupancy in FY2020/21 should be listed separately from any other revenues due to reduced occupancy could include things like fees for housing, dining, student activities, parking, etc. Other lost revenues could include things like revenues due to reduced occupancy could include things like fees for housing, dining, student activities, parking, etc. Other lost revenues could include things like revenues from camps and conferences, revenues related to athletic events and/or student activities, and any other imputed revenues that have been lost due to the pandemic.)

HINIVERSITY

Student Reengagement Expense - these lines should reflect the amount of institutional share dollars from CRRSAA and/or ARPA funds being used to discharge a student's unpaid balance.

Each university's allocations from the CARES Act, CRRSAA, and ARPA can be found in the Data & Reference tab of this template. Totals for rows 17, 18, 19, 20, 69, 70, 73, 74, 77, and 78 should match amounts in the Data & Reference tab.

FY 2023-24 Comprehensive Planning Process (CPP) Projections Workbook Indiana University of Pennsylvania Use of Coronavirus State Fiscal Recovery Funds (CSFRF)

The intent of this schedule is to capture how universities are planning to use the \$125M in CSFRF appropriated in FY 2022-23. This information should be excluded from the E&G and/or Auxiliary budget tabs within this template.

\$125M

This schedule should exclude revenue and/or expenses related to the \$50M in CSFRF received in FY 2021-22, CARES Act, CRRSAA, and ARPA.

FY 2023-24 Comprehensive Planning Process (CPP) Projections Workbook Indiana University of Pennsylvania Housing Occupancy Rates

This tab only needs to be completed by universities that are projecting less than 70% housing occupancy in any year within the planning period and only applies to university-owned housing with master leases with the State System. To complete this tab, universities should copy their respective portion of housing information provided in Columns B – M of the Housing Reference Data tab to columns B – M in this tab. In columns O – Q, each university should provide their projected average occupancy rates for university-owned housing units and housing units with master leases with the State System.

If a university is required to complete this tab, the Housing chart within the Charts for Narrative tab should be copied and pasted into the CPP Narrative Tocument, and the narrative should include a description of the university's plan to address these low-housing occupancy circumstances.
